

Vendor and Restaurant Profile Management System

Software Requirements Specification

Module: Vendor and Restaurant Management

Team C

Version 1.0

June 2026

1. Introduction

1.1 Purpose

This Software Requirements Specification (SRS) defines the functional and non-functional requirements for the Vendor and Restaurant Management System module of a web-based restaurant review platform.

1.2 Scope

1.2.1 Scope

The module enables restaurant owners to manage restaurant profiles, menus, media, reviews, ownership claims, user-submitted restaurants, and performance analytics.

1.2.2 Out of Scope

Reservations, payment processing, advertising campaigns, AI concierge services, advanced BI reporting, and franchise management are excluded from Version 1.0.

1.3 Definitions and Abbreviations

Term	Definition
SRS	Software Requirements Specification
FR	Functional Requirement
NFR	Non-Functional Requirement
UC	Use Case
VR	Vendor & Restaurant Management
VP	Vendor Profile Management
MM	Menu & Media Management
RR	Review Interaction Management
VD	Vendor Dashboard
RO	Restaurant Owner
RU	Registered User
MOD	Moderator
ADMIN	Administrator

1.4 Document Overview

Section 2 describes system context. Section 3 details functional requirements. Section 4 lists non-functional requirements. Section 5 presents use cases. Section 6 contains revision history.

2. Overall Description

2.1 System Context

The Vendor and Restaurant Management System interacts with Authentication, Restaurant Discovery, and Moderation systems.

2.2 User Classes

Guest User, Registered User, Restaurant Owner, Moderator, Administrator.

2.3 Assumptions and Dependencies

Assumptions

- Vendors provide accurate restaurant information and maintain their profiles.
- Registered users submit valid restaurant information when adding new restaurants.
- Moderators review restaurant submissions and ownership claims.
- Users have access to a modern web browser and internet connection.
- Restaurants may initially exist as unclaimed listings until ownership is verified.

External Dependencies

- User & Authentication System for login, account management, and role-based access control.
- Restaurant Discovery System for displaying restaurant profiles, menus, and media.
- Moderation & Review System for review management, restaurant approval, and ownership verification.
- Database and media storage services for storing restaurant information and uploaded content.

3. Functional Requirements

3.1 Vendor Profile & Restaurant Ownership Management

Req ID	Feature	Description	Priority
FR-VR-VP-001	Vendor Registration	Vendor account creation	High
FR-VR-VP-002	Vendor Login	Vendor authentication	High

FR-VR-VP-003	Edit Vendor Profile	Update vendor details	High
FR-VR-VP-004	Password Management	Change password	Medium
FR-VR-VP-005	Notification Settings	Manage notifications	Medium
FR-VR-VP-006	Create Restaurant Profile	Create restaurant listing	High
FR-VR-VP-007	Edit Restaurant Profile	Modify details	High
FR-VR-VP-008	Operating Hours	Manage hours	High
FR-VR-VP-009	Cuisine Categories	Assign cuisines	High
FR-VR-VP-010	Tags	Assign searchable tags	Medium
FR-VR-VP-011	Business Verification	Submit verification	Medium
FR-VR-VP-012	Profile Completion	Completion meter	Low
FR-VR-VP-013	Submit Restaurant	Registered user submits new restaurant	High
FR-VR-VP-014	Duplicate Detection	Check duplicate restaurants	High
FR-VR-VP-015	Unclaimed Status	Mark approved submissions unclaimed	High
FR-VR-VP-016	Ownership Claim	Vendor claims restaurant	Medium
FR-VR-VP-017	Claim Approval	Moderator approves/rejects claim	Medium
FR-VR-VP-018	Claim Tracking	View claim status	Medium

3.2 Menu & Media Management

Req ID	Feature	Description	Priority
FR-VR-MM-001	Upload Menu	Upload menu	High
FR-VR-MM-002	Edit Menu Items	Modify menu	High
FR-VR-MM-003	Update Pricing	Update prices	High
FR-VR-MM-004	Delete Menu Items	Remove items	Medium
FR-VR-MM-005	Upload Food Images	Upload photos	High
FR-VR-MM-006	Restaurant Gallery	Manage gallery	Medium
FR-VR-MM-007	Delete Media	Remove outdated media	Medium
FR-VR-MM-008	Media Preview	Preview uploads	Low

3.3 Review Interaction Management

Req ID	Feature	Description	Priority
FR-VR-RR-001	View Reviews	View customer reviews	High

FR-VR-RR-002	Respond Reviews	Respond to reviews	High
FR-VR-RR-003	Flag Review	Report inappropriate review	Medium
FR-VR-RR-004	Review History	Track interactions	Medium
FR-VR-RR-005	Review Filters	Filter reviews	Low
FR-VR-RR-006	Sort Reviews	Review sorting	Medium
FR-VR-RR-007	Review Notifications	Alert system	High
FR-VR-RR-008	Review Search	Keyword search	Low
FR-VR-RR-009	Review Statistics	Rating summary	Medium
FR-VR-RR-010	Unanswered Reviews	Response tracking	Medium

3.4 Vendor Dashboard & Analytics

Req ID	Feature	Description	Priority
FR-VR-VD-001	Rating Summary	Show ratings	High
FR-VR-VD-002	Review Count	Display counts	High
FR-VR-VD-003	Profile Views	Display views	Medium
FR-VR-VD-004	Engagement Stats	Show engagement	Medium
FR-VR-VD-005	Activity Reports	Generate reports	Medium
FR-VR-VD-006	Performance Trends	Trend charts	Low

4. Non-Functional Requirements

NFR ID	Category	Requirement	Priority
NFR-VR-001	Performance	Dashboard loads within 2 seconds	High
NFR-VR-002	Performance	Menu updates saved within 2 seconds	High
NFR-VR-003	Usability	Responsive on desktop/tablet/mobile	High
NFR-VR-004	Security	Role-based access control	High
NFR-VR-005	Security	Passwords stored securely	High
NFR-VR-006	Accessibility	ARIA labels for controls	Medium
NFR-VR-007	Scalability	Support 10,000 restaurant profiles	Medium
NFR-VR-008	Compatibility	Latest browsers supported	Medium
NFR-VR-009	Reliability	Graceful error handling	High
NFR-VR-010	Availability	99% uptime target	Low
NFR-VR-011	Performance	Fast review load	High
NFR-VR-012	Security	Secure data access	High
NFR-VR-013	Usability	Easy to use UI	High
NFR-VR-014	Reliability	No data loss	High
NFR-VR-015	Scalability	Handle more users	Medium

5. Use Case Summary

UC-VR-01 Create Vendor Account

Primary Actor: Restaurant Owner or Registered User

Description: Allows actor to perform the requested operation.

Goal: Complete the operation successfully.

Trigger: User selects the corresponding action.

Preconditions: User is authenticated and authorized.

Main Success Scenario:

1. User opens page.
2. User enters required data.
3. System validates input.
4. Data saved.
5. Success confirmation displayed.

Alternative Flows:

- Validation failure.
- Duplicate data detected.
- Permission denied.

Postconditions: Data is stored and visible where applicable.

Priority: High

UC-VR-02 Create Restaurant Profile

Primary Actor: Restaurant Owner or Registered User

Description: Allows actor to perform the requested operation.

Goal: Complete the operation successfully.

Trigger: User selects the corresponding action.

Preconditions: User is authenticated and authorized.

Main Success Scenario:

1. User opens page.
2. User enters required data.
3. System validates input.
4. Data saved.
5. Success confirmation displayed.

Alternative Flows:

- Validation failure.
- Duplicate data detected.
- Permission denied.

Postconditions: Data is stored and visible where applicable.

Priority: High

UC-VR-03 Submit New Restaurant

Primary Actor: Restaurant Owner or Registered User

Description: Allows actor to perform the requested operation.

Goal: Complete the operation successfully.

Trigger: User selects the corresponding action.

Preconditions: User is authenticated and authorized.

Main Success Scenario:

1. User opens page.
2. User enters required data.
3. System validates input.
4. Data saved.
5. Success confirmation displayed.

Alternative Flows:

- Validation failure.
- Duplicate data detected.
- Permission denied.

Postconditions: Data is stored and visible where applicable.

Priority: High

UC-VR-04 Claim Restaurant Ownership

Primary Actor: Restaurant Owner or Registered User

Description: Allows actor to perform the requested operation.

Goal: Complete the operation successfully.

Trigger: User selects the corresponding action.

Preconditions: User is authenticated and authorized.

Main Success Scenario:

1. User opens page.
2. User enters required data.
3. System validates input.
4. Data saved.
5. Success confirmation displayed.

Alternative Flows:

- Validation failure.
- Duplicate data detected.
- Permission denied.

Postconditions: Data is stored and visible where applicable.

Priority: High

UC-VR-05 Upload Menu

Primary Actor: Restaurant Owner or Registered User

Description: Allows actor to perform the requested operation.

Goal: Complete the operation successfully.

Trigger: User selects the corresponding action.

Preconditions: User is authenticated and authorized.

Main Success Scenario:

1. User opens page.
2. User enters required data.
3. System validates input.
4. Data saved.
5. Success confirmation displayed.

Alternative Flows:

- Validation failure.
- Duplicate data detected.
- Permission denied.

Postconditions: Data is stored and visible where applicable.

Priority: High

UC-VR-06 Upload Media

Primary Actor: Restaurant Owner or Registered User

Description: Allows actor to perform the requested operation.

Goal: Complete the operation successfully.

Trigger: User selects the corresponding action.

Preconditions: User is authenticated and authorized.

Main Success Scenario:

1. User opens page.
2. User enters required data.
3. System validates input.
4. Data saved.
5. Success confirmation displayed.

Alternative Flows:

- Validation failure.
- Duplicate data detected.
- Permission denied.

Postconditions: Data is stored and visible where applicable.

Priority: High

UC-VR-07 Respond to Review

Primary Actor: Restaurant Owner or Registered User

Description: Allows actor to perform the requested operation.

Goal: Complete the operation successfully.

Trigger: User selects the corresponding action.

Preconditions: User is authenticated and authorized.

Main Success Scenario:

1. User opens page.
2. User enters required data.
3. System validates input.
4. Data saved.
5. Success confirmation displayed.

Alternative Flows:

- Validation failure.
- Duplicate data detected.
- Permission denied.

Postconditions: Data is stored and visible where applicable.

Priority: High

UC-VR-08 View Dashboard

Primary Actor: Restaurant Owner or Registered User

Description: Allows actor to perform the requested operation.

Goal: Complete the operation successfully.

Trigger: User selects the corresponding action.

Preconditions: User is authenticated and authorized.

Main Success Scenario:

1. User opens page.
2. User enters required data.
3. System validates input.
4. Data saved.
5. Success confirmation displayed.

Alternative Flows:

- Validation failure.
- Duplicate data detected.
- Permission denied.

Postconditions: Data is stored and visible where applicable.

Priority: High

6. Revision History
