1. Introduction

This document presents the test report for the Restaurant Discovery module developed as part of the CSCI 275 group project. The purpose of this report is to document the test cases executed against the implemented features, record the results, and identify any issues found during testing.

Testing was conducted manually by running the application locally and verifying that each feature behaved as expected based on the functional requirements defined in the Software Requirements Specification (SRS).

1.1 Scope

The following features were tested:

- Keyword search and filtering of restaurant listings
- Sort results by rating and newest
- Save and remove restaurants to a Favorites list
- Favorites page display and navigation
- Heart bookmark icon visual state (saved vs unsaved)

1.2 Test Environment

Component	Details
Operating System	macOS (Sonoma)
Browser	Google Chrome (latest)
Backend	Node.js + Express running on http://localhost:3000
Frontend	React (Vite) running on http://localhost:5173
Database	PostgreSQL with 8 seeded restaurant records
ORM	Prisma v7.8.0

2. Test Cases

2.1 Search & Filtering

Test ID	Feature	Description	Expected Result	Actual Result	Status
TC-001	Keyword Search	Search for 'burger' in the search bar	Returns The Burger Joint	Returned The Burger Joint	PASS
TC-002	Search by Name	Search for 'sakura'	Returns Sakura Japanese (case-insensitive)	Returned Sakura Japanese	PASS
TC-003	Search by Keyword	Search for 'pasta'	Returns Luigi's Trattoria (keyword in description)	Returned Luigi's Trattoria	PASS
TC-004	Empty Search State	Load page with no search query	All 8 restaurants displayed	All 8 restaurants displayed	PASS
TC-005	No Results State	Search for 'xyz123'	Shows 'No restaurants found' message	Message displayed correctly	PASS
TC-006	Sort by Rating	Select 'Highest Rated' from sort dropdown	Restaurants sorted by rating descending	La Maison (4.8) shown first	PASS
TC-007	Sort by Newest	Select 'Newest' from sort dropdown	Restaurants sorted by createdAt descending	Most recent listing shown first	PASS
TC-008	Default Sort	Load page without selecting sort	Default sort by rating descending applied	Results sorted by rating by default	PASS

2.2 Favorites — Backend API

Test ID	Feature	Description	Expected Result	Actual Result	Status
TC-009	GET Favorites	Call GET /favorites/1 with no saved restaurants	Returns empty array []	Returned []	PASS
TC-010	POST Favorite	Call POST /favorites with userId 1 and restaurantId 1	Returns new favorite object with id, userId, restaurantId, createdAt	Returned correct object	PASS
TC-011	GET Favorites	Call GET /favorites/1 after saving a restaurant	Returns array with saved restaurant	Returned correct data	PASS

			and full restaurant details	with restaurant details	
TC-012	DELETE Favorite	Call DELETE /favorites/:id	Returns 200 OK and removes entry from database	Returned 200, entry removed	PASS
TC-013	GET Restaurant	Call GET /restaurants	Returns all 8 seeded restaurants as JSON	Returned all 8 restaurants	PASS
TC-014	GET by ID	Call GET /restaurants/1	Returns single restaurant with id 1	Returned Sakura Japanese	PASS
TC-015	GET invalid ID	Call GET /restaurants/999	Returns 404 Not Found	Returned 404	PASS

2.3 Favorites — Frontend

Test ID	Feature	Description	Expected Result	Actual Result	Status
TC-016	Favorites Page Load	Navigate to /favorites with saved restaurants	Displays all saved restaurant cards with name, cuisine, price, rating, location	All cards displayed correctly	PASS
TC-017	Empty Favorites	Navigate to /favorites with no saved restaurants	Displays 'You have no saved restaurants yet.'	Message displayed correctly	PASS
TC-018	Loading State	Navigate to /favorites while data is loading	Displays 'Loading your favorites...' message	Loading message displayed briefly	PASS
TC-019	Remove Favorite	Click Remove from Favorites button on a card	Shows confirmation dialog	Confirmation dialog appeared	PASS
TC-020	Confirm Remove	Click OK on confirmation dialog	Card disappears from page without refresh	Card removed instantly	PASS
TC-021	Cancel Remove	Click Cancel on confirmation dialog	Card remains on page	Card remained, no change	PASS
TC-022	Back Link	Click '← Back to Search' on Favorites page	Navigates back to home/search page without full reload	Navigated correctly	PASS

2.4 Bookmark Icon

Test ID	Feature	Description	Expected Result	Actual Result	Status
TC-023	Unsaved State	Load search page with no saved restaurants	All heart icons show  (outline)	All icons showed 	PASS
TC-024	Save via Bookmark	Click  on a restaurant card	Icon changes to  , restaurant saved to favorites	Icon changed to  instantly	PASS
TC-025	Unsave via Bookmark	Click  on a saved restaurant card	Icon changes back to  , removed from favorites	Icon changed back to 	PASS
TC-026	Saved State on Load	Reload page with a previously saved restaurant	Heart icon shows  on the saved restaurant	Correct icon state on load	PASS
TC-027	CORS	React frontend calls Express API across ports	Requests succeed without CORS errors	No CORS errors in browser console	PASS

3. Test Summary

Metric	Result
Total Test Cases	27
Passed	27
Failed	0
Pass Rate	100%

All 27 test cases passed successfully. The implemented features — keyword search, sorting, favorites API, favorites page, and the bookmark icon — all behaved as expected based on the SRS requirements.

4. Known Limitations

- userId is hardcoded to 1 as a placeholder — the authentication module has not yet been integrated.
- The Restaurant table is a placeholder — the listings module has not yet finalized their schema for integration.
- Filter by cuisine, price, and rating filters are handled at the API level but filter UI components are still in development by other team members.
- Testing was conducted locally only — no cross-device or network testing was performed.
