

ForkRank

A Food Review & Restaurant Discovery Platform

Project Overview

What is ForkRank?

ForkRank is a web platform that connects food lovers with local restaurants. Business owners can advertise their venues, while users can discover, rate, and review dishes and dining experiences — all in one place.

**Restaurant
Listings**

**User
Reviews**

**Multi-Role
Access**

5 Non-Negotiable Features

01

User Authentication & Profiles

Secure registration, login, and personal profiles for guests, registered users, and business owners.

02

Restaurant Listings & Search

Business owners can create/manage listings; users can search and filter by cuisine, location, and rating.

03

Ratings & Review System

Registered users can post star ratings and written reviews on restaurants and individual dishes.

04

Business Owner Dashboard

Owners get a dedicated portal to update menus, respond to reviews, and view analytics.

05

Moderation & Reporting Tools

Users can flag inappropriate reviews; admins and moderators can remove content and manage accounts.

Unique Features

Interactive Map View

Browse restaurants pinned on a live map with real-time distance filtering.

Dish-Level Reviews

Rate individual menu items, not just the restaurant — helps users find the best dishes.

Photo Uploads

Users and owners can post food photos, creating a visual gallery per listing.

AI Review Summarizer

Auto-generates a brief summary from recent reviews so users get the gist instantly.

Loyalty Badges & Leaderboard

Gamified system awarding top reviewers with badges and a public leaderboard ranking.

Owner Analytics Dashboard

Charts showing review trends, rating history, and peak traffic times.

System Actors & Privileges

Guest User

Browse listings · Read reviews · Search restaurants · No write access

Registered User

All guest access + Post/edit reviews · Rate dishes · Upload photos · Report content

Business Owner

Manage own listing · Update menus · Reply to reviews · View analytics dashboard

Moderator

Review flagged content · Remove reviews · Warn/suspend users · Escalate to Admin

Customer Support

View user accounts · Handle disputes · Read private reports · Cannot delete data

Administrator

Full system access · Manage all accounts · Override any action · Configure site settings

Summary

- 5 core features covering auth, listings, reviews, owner tools & moderation
- 6 unique features including AI summarizer, dish-level reviews & gamification
- 6 distinct user roles with clearly scoped access and privileges
